

The coup has taken place please give the airwaves back to the citizens. What does the Administration have to do before America wakes up? I could be part of your special interest group, but choose to be honest. Surpressed freedom of speech will lead this nation down the wrong path. Not allowing XM radio to do local broadcasts needs to be looked at. Is the reason to surpress them because they they could become part of the single source of information we are now getting or is it because they will hurt the current crop of robber barons. Please look into the rushs of the world. Those who have turned 70% of Americans into people without their own thoughts.

You guys share one brain that doesn't mean I can't have my own. Look at what your leadership has gotten us. Enron, 9/11, Iraq, should I go on? France Germany & Russia were right. They were actually on our side trying to help. but did we listen. No, History repeats iteslf. If you guys had just watched and understood Lawrence of Arabia you would never lead us into the dessert. Free the air waves, give us but freedom.
